EXPERIENCE

Programmer Analyst Trainee - Cognizant

08/2025 – Present

Java Full Stack | Spring Boot | React

- Completed comprehensive training in **Java Full Stack Development**, covering Core Java, Spring Boot, RESTful APIs, React.js, and SQL.
- Built full-stack applications by integrating **Spring Boot** backend services with **React.js** frontend components.
- Designed and implemented **RESTful APIs** using a layered architecture and integrated them with responsive React-based user interfaces.
- Worked with **Spring Data JPA/Hibernate, MySQL, Maven, Postman**, and **Swagger** for backend development, database management, API testing, and documentation.
- Acquired foundational knowledge of **CI/CD, Jenkins, Git**, and **Agile** development practices, with exposure to automated build and deployment workflows.
- Collaborated on team-based projects while following **clean coding principles, Git-based version control**, and industry-standard software development practices.

EDUCATION

Intermediate (CBSE)

Hamdard Public School, Delhi
Percentage: 68.8%

2018 – 2020

Matriculation (CBSE)

St Michaels High School, Patna
Percentage: 86.6%

2018

Bachelors in Computer Science Engineering

Chandigarh University, Gharuan
Score: 7.52 CGPA

2021 – 06/2025

SKILLS

- JAVA
- REST APIs
- SQL
- CI/CD Fundamentals
- Swift
- Spring , Spring Boot
- Microservices
- GIT
- Jenkins
- SwiftUI

INTERPERSONAL SKILLS

Team Leadership
Management & Coordination
Decision Making
Creative Thinking

CERTIFICATES

- Introduction to iOS Mobile Application Development, Meta [🔗](#)
- Introduction to iOS App Development with Swift 5, LearnQuest [🔗](#)
- Advanced Programming in Swift , Meta [🔗](#)

PROJECTS

Hotel Management System - Cognizant

- Developed a full-stack Hotel Management application using React and Spring Boot.
- Designed microservices for room management, reservations, authentication, and customer services.
- Used Eureka for service discovery.
- Built RESTful APIs using Spring Boot.
- Integrated MySQL using Spring Data JPA and Hibernate.

GAMAN – Seamless Journeys Across Delhi-iOS Application

GAMAN (गमन) is derived from the Sanskrit word meaning "movement" or "journey", reflecting the app's core purpose to make your travel experience across Delhi smoother, smarter, and more informed. Whether you're catching a DTC bus or tracking real-time bus locations, **GAMAN** ensures you stay ahead of the rush and in control of your commute. Designed with simplicity and scale in mind, it's your go-to iOS app for reliable, real-time public transit updates across the capital.

MargMitra - Your Friendly Guide to Delhi! [🔗](#)

An iOS app designed to help you explore the vibrant city of Delhi with ease and confidence.

MargMitra (मार्गमित्र) combines the Hindi words for "path" (Marg) and "friend" (Mitra), encapsulating the app's mission to be your trusted companion as you navigate the historical, cultural, and modern landmarks of Delhi.
