🇮🇳 Indian

SUMMARY

Data Engineer with total 10 years of experience in developing ETL frameworks and cloud data migration. Currently leads a team at Accenture, successfully migrated 100TB of data to GCP BigQuery. Previous roles at Cognizant and Tata Consultancy Services included automating processes and building data ingestion pipelines. Proficient in Python, PySpark, SQL, and cloud technologies, with a strong focus on Agile methodologies and team management.

EXPERIENCE

Management and Governance Associate Manager - Data Engineer

Accenture

📅 09/2023 - 01/1970 📍 Noida, India

Leading a team as a Data Engineer focusing on data migration and management

- Developed **ETL** framework using **SQL** and **PySpark**
- Led migration of **100TB+** data from on-prem **Oracle** databases to **GCP BigQuery**
- Managed migration of **300+** database tables to the cloud; reduced migration time by **30%**
- Automated **ETL** workflows, reducing manual intervention by **90%**
- Refactored scripts using **Airflow** and GCP tools; handled **sensitive data** with Terraform
- Managed a team of three technical associates at offshore location, partnering with the client and cross-functional teams to clarify business requirements and implement solutions through Agile methodologies
- Refactored shell/Python scripts to equivalent **DAGs** using Task Group, BigQuery, Storage Client, and **Airflow operators**.
- Implemented Infrastructure as Code (IaC) using **Terraform** to automate the provisioning of cloud resources, including the development of service accounts and the assignment of fine-grained **IAM** permissions.
- Automated the implementation of BigQuery column policy tags for sensitive data using Terraform, establishing fine-grained access controls via **Dataplex**.

Senior Associate Project - Data Engineer

Cognizant

📅 04/2021 - 09/2023 📍 Gurgaon, India

Contributed as a Senior Associate Project focusing on data engineering solutions

- SFT Certified on **AMEX** platform.
- Automated the manual Excel-based GDE feed update process by developing a logical master data (MD) sheet, reducing manual effort by 18 person-hours.
- Developed PySpark scripts to analyze and generate data statistics from Hive tables, enabling the identification of optimal ETL strategies to meet business requirements.
- **Designed and developed data ingestion pipelines** to process various file formats such as fixed-width and CSV from diverse sources including Mainframe and SFTP into Hive, while creating and optimizing custom functions and modules tailored to specific feed types.
- Contributed to team growth by participating in the recruitment of data engineers, conducting onboarding and technical training for new hires, and providing mentorship to junior team members.
- Utilized in-house tools such as **Magellan** for SQL development, **Event Engine** for job monitoring and scheduling, and **Cornerstone** for managing and configuring data ingestion pipelines.

EDUCATION

B.Tech

Cochin University of Science & Technology

📅 08/2011 - 05/2015 📍 Kochi, Kerala

All India Senior School Certificate

St. Joseph's Public School

📅 04/2009 - 03/2010 📍 Dalsinghsarai

All India Secondary School Examination

Jawahar Navodaya Vidyalaya

📅 04/2006 - 03/2008 📍 Supaul

SKILLS

GCP (GCS BQ DataProc Cloud Function Dataplex SDP IAM Log Explorer)

GitLab Python PySpark

SQL Agile Airflow

Terraform Unix Shell Scripting

HiveQL Big Data Oozie

Athena GitLab Confluence

JIRA Sqoop Vault

KEY ACHIEVEMENTS

Award for Automation Excellence

Received Reward & Recognition from AMEX for automation using PySpark and Python

Star Performer Recognition

Recognized as a Star Performer for project delivery and customer coordination

Appreciation for Resilient Automation

Received appreciation for resilient process automation and project completion from Dous Gownie

EXPERIENCE

IT Analyst - Data Engineer

Tata Consultancy Services

📅 06/2015 - 04/2021 📍 Gurgaon, India

Worked as an IT Analyst focusing on data engineering and process automation

- Developed Sqoop jobs for large-scale data import and daily BAU ingestion
- Built secure, optimized ingestion logic and automated code deployment
- Managed team for SQL/Python to PySpark migration and Agile project delivery
- Developed Sqoop jobs to efficiently import three years of historical data in a single load and implemented incremental load logic for updated records, orchestrated through Oozie workflows.
- Designed and implemented Spark-based ingestion pipelines to automate and optimize daily BAU data processing.
- Built data ingestion logic integrated with encryption and decryption mechanisms using Hive and SQL, ensuring secure and compliant data handling in a fixed-bid project environment.
- Delivered optimized, scalable solutions to customers in an Agile environment, managing end-to-end development — from requirement analysis and coding to unit testing, version control (Git), and automated deployment via Jenkins.
- Led and mentored a team of 3 Data Engineers in migrating legacy SQL and Python scripts to PySpark, enhancing performance and maintainability of data pipelines.

TRAINING / COURSES

Intellipat 07/2019 01/2020

ScholarNet 01/2023 06/2023

GCP Certification

HOBBIES INTERESTS

Enjoys shopping and listening to music

Read Quran and enjoys learning new thing

Passionate about teaching and sharing knowledge
